

Designer

Liav Dahari

Objective

BA Computer Science student and multidisciplinary designer with expertise in 3D modeling, motion design, and brand development. Seeking to merge creative design skills with technical problem-solving in a forward-thinking company, with the goal of contributing to innovative product design, digital marketing, and user-centered solutions.

Experience

January 2014 - Current

Designer *Self-Employed*

Specializing in comprehensive brand development, from logo creation and packaging design to motion graphics and media campaigns. Skilled at translating client requirements into compelling visual solutions while maintaining design consistency across cross-functional collaborations. Combines strategic thinking with creative execution to deliver engaging visual experiences that bring concepts to life.

September 2018 - December 2023

Teacher, Events Coordination Assistant The Brandeis School

Balanced classroom instruction with event planning responsibilities, demonstrating strong organizational and multitasking abilities. Contributed to both academic excellence and community engagement by delivering quality education while managing logistics for school-wide events and programs.

December 2023 - June 2024

Inventory Specialist & Digital Marketing *New Metro Dispensary*

Oversaw compliant inventory management while creating 3D marketing products, videos, and digital assets to boost brand visibility. Collaborated with vendors to execute strategies that increased sales and aligned marketing with product availability. Leveraged sales data to guide reordering and optimize promotions.
